

ISO 44001 Collaborative Leaders Course

Our Objective

The Collaborative Leaders Accreditation is to provide suitably qualified candidates with knowledge and skills of BS 11000, such that its implementation brings value to their organizations.

Introduction

The BS 11000 is the British Standard that provides a strategic collaborative framework for organizations, based on ICW's CRAFT methodology, to build and manage collaborative relationships so that the relationships are effective, optimized, and sustainable to deliver benefits for all stakeholders.

As BS 11000 has become increasingly recognized and adopted, ICW identified a significant need for organizations to develop internal champions/facilitators to lead and support implementation programs, who have the knowledge and skills so that organizations gain real value from the adoption of the Standard.

Who should attend?

Those who have been asked to lead manage or execute the implementation of BS11000.

Aims of the Course

Delegates will:

- Understand why relationships are important in delivering business strategy
- Understand the value of a pan-industry framework to enhance engagement and provide a benchmark for collaborative capability
- Identify the business objectives and constraints for effective engagement along with risk management

- Identify the importance of assessing an organization's internal capability as a prerequisite to external engagement
- Identify the strategies and process for selecting partners
- Be aware of effective policies for developing the right working model for organizations and engaging a partner in a relationship
- Understand the importance of continuous improvement, innovation, and value creation to develop the relationship to its fullest extent
- Appreciate the importance of effective measurement and monitoring of performance and the relationship
- Understand the critical need to define the exit strategy for managed disengagement.

Overview of the Course

The course is an intensive and interactive four-day residential program developed by ICWs Knowledge Architect and is structured to both facilitate knowledge transfer based on ICWs CRAFT methodology and extensive experience with BS 11000 implementations and successful customer certifications by BSI.

- **Day 1/2** - Introduction to the changing marketplace and the role of collaborative working, leading to the development of BS 11000. An in-depth and interactive Masterclass providing insight into the eight-stage life-cycle model of the Standard.
- **Day 3** - A written examination takes place in the morning, to test the candidate's level of knowledge. On completion, candidates are given one of the standard's eight stages on which to prepare a presentation. The afternoon is set aside for the preparation of the stage presentation and case study presentations.
- **Day 4** - Each candidate presents his/her assigned stage and a related case study presentation to the peer group and BS 11000 experts. The course ends with reflection, feedback, and next steps for the candidates.

Benefits to Your Business

Following the course Delegates will have;

- Reinforced their understanding of BS 11000 and how it helps to embed collaborative working.
- Been provided with tools and techniques as implementation champions to facilitate effective collaborative programs.

- Their knowledge and skills are independently validated.
- Increased confidence to harness the power of collaborative working and maximize performance for their business.
- A platform on which to prepare their organization for continual improvement and certification.

Course Design and Delivery – The course will be delivered by David Hawkins and Andy Akrouche
